

BRASS Install – TNS_ADMIN Environment Variable setting

Log on as Administrator.

Click Start.

Click Settings.

Click Control Panel.

Double click the **System** icon.

Click the **Advanced** tab.

Click the **Environment Variables** button.

In the User Variables area, click the **NEW....** Button.

In the Variable Name field, type **TNS_ADMIN**.

In the Variable Value field, type the path to where your TNSNAMES file is located, for example,
\\ProdServer\BRASS-32\TNSNAMES.

Click OK.

Click OK once again.

Click OK once last time.
